diploma thesis from the year 2004 in the subject computer science commercial information technology grade 1 0 university karlsruhe th aifb forschungszentrum informatik fzi language english abstract business process management bpm is a topic that is generating a level of interest in both academic and business circles the issues and problems that are associated with implementing and gaining support for bpm within organisations are well known bpm maturity however is something that organisations aspire to

but know little about research to date indicates that many organisations do not progress past very rudimentary levels of bpm maturity this is likely due to bpm being seen as a complex and complicated issue this research looks at what successful organisations see as being key to bpm and what organisations that are unsuccessful in bpm implementation consider being the issues that contributed to their failure bpm is defined as a holistic management practice that includes the alignment of processes with the corporate strategy and especially with strategic and operational goals whilst the use of both methodologies and information technology as supporting and enabling functions is important for bpm organisational and cultural change is identified as one of the critical success factors for bpm implementations this research focuses on defining bpm maturity in a meaningful and measurable way it addresses the complexity of bpm maturity by firstly defining what bpm maturity means and then developing a model that can be used to measure current levels of maturity in addition bpm related benefits are identified such as increased effectiveness efficiency or quality increased bpm maturity is characterised as being correlated with an increased probability of achieving these benefits an increased maturity can lead to a decreased gap between objectives and a current situation objectives are also more likely to be met due to less varying results and therefore greater ability to predict results the organisation wide deeper understanding of how the business is conducted results in work being more consistent and repeatable and as a result more effectively and efficiently other benefits of the model are the ability of the organisation to determine strengths and weaknesses in current applications in doing this the organisations see benefits in being able to expand knowledge sharing within the organisation by learning from the successes within its own self

business process management bpm has become one of the most widely used approaches for the design of modern organizational and information systems the conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities this handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading bpm thought leaders this first volume focuses on arriving at a sound definition of business process management approaches and examines bpm methods and process aware information systems as such it provides guidance for the integration of bpm into corporate methodologies and information systems each chapter has been contributed by leading international experts selected case studies complement these views and lead to a summary of bpm expertise that is unique in its coverage of the most critical success factors of bpm
